Thank you for purchasing The Three Pupper Studios Recent Scene Manager!

To access the Recent Scenes tool select "File/Recent Scenes". This will open the Recent Scenes Window.

Recent Scenes also offers an additional option "File/Open Previous Scene" which will open the last scene you had open prior to the current one.
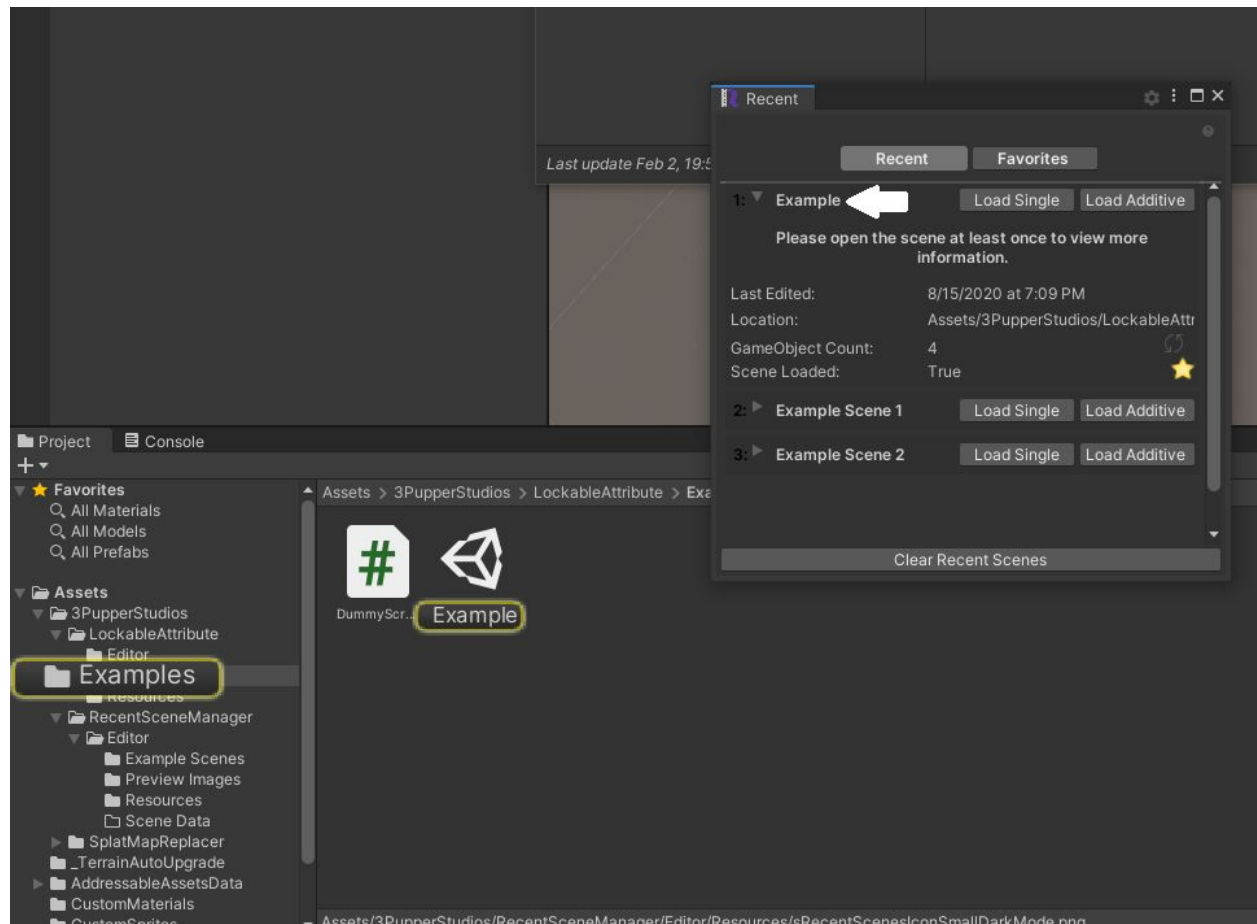

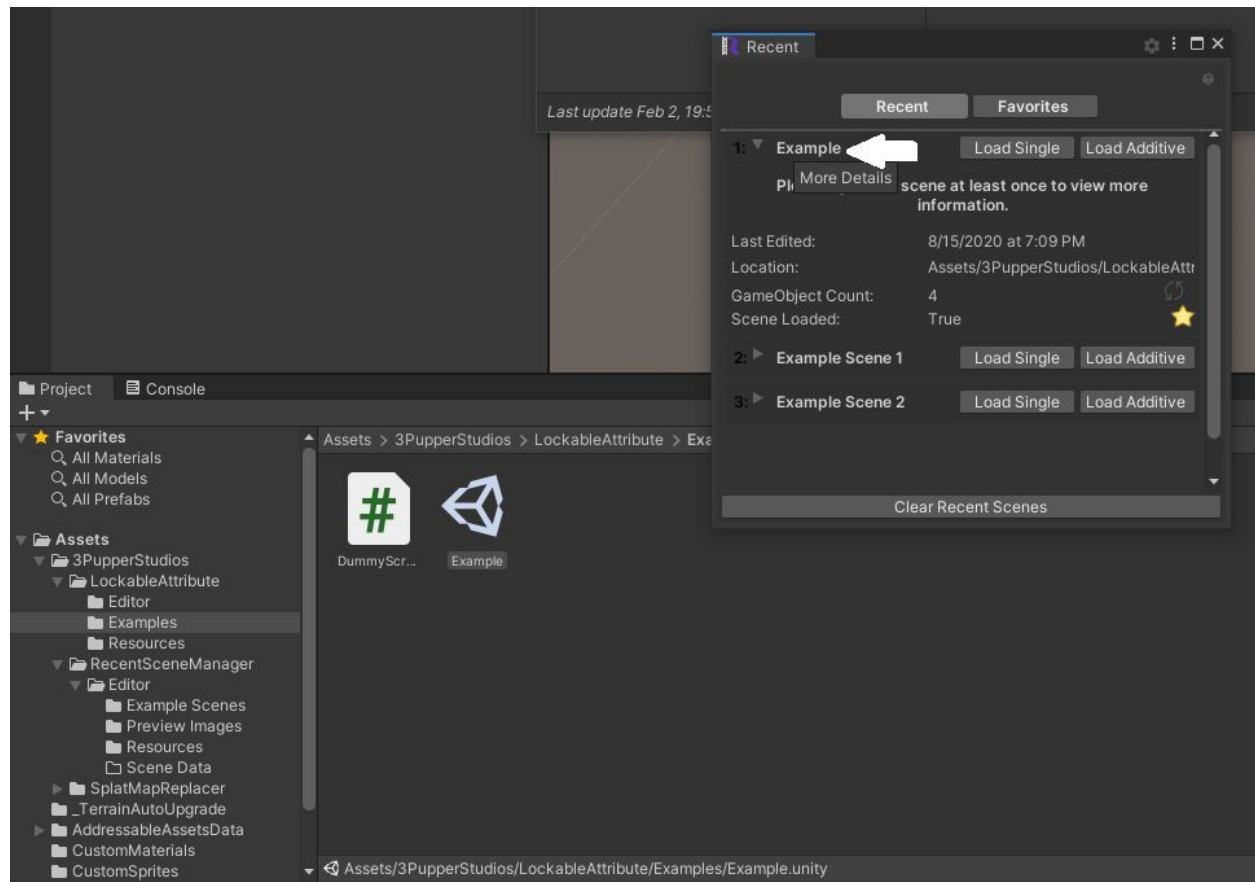

To take full advantage of this tool:

■ The scenes are listed and numbered in order of most recently used.
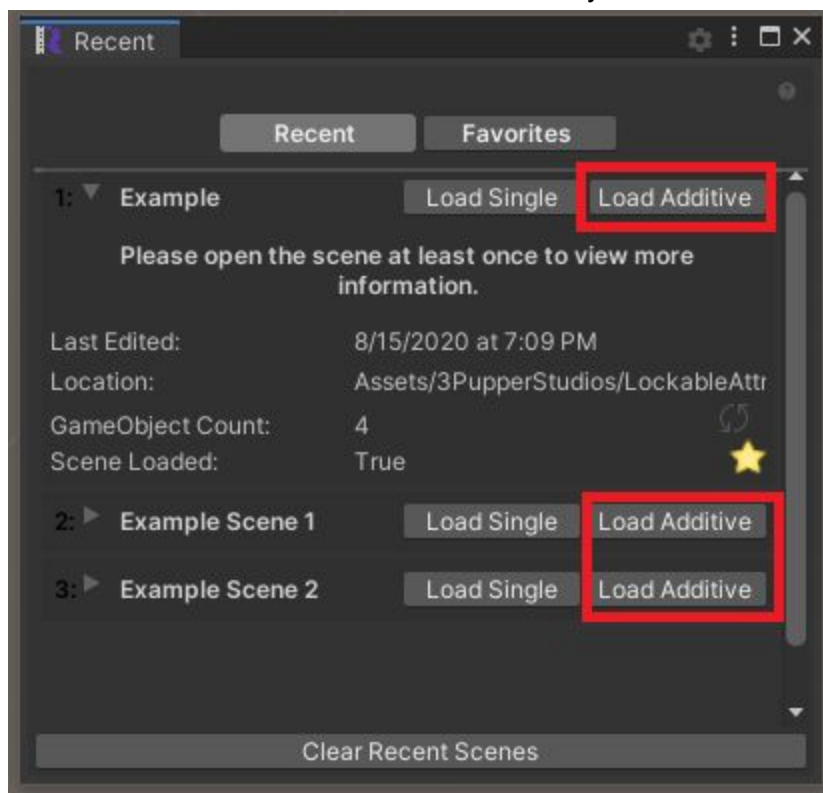

■ Click the name of the scene to ping the scene asset.

■ If on Windows: Alt + click the name of the scene to select the scene asset.
■ If on Mac: Option + click the name of the scene to select the scene asset.

■ If on Windows: Ctrl + click the name of the scene to select the scene asset. (Allows for multi-Select if you click multiple scene names)
■ If on Mac: Command + click the name of the scene to select the scene asset.(Allows for multi-Select if you click multiple scene names)
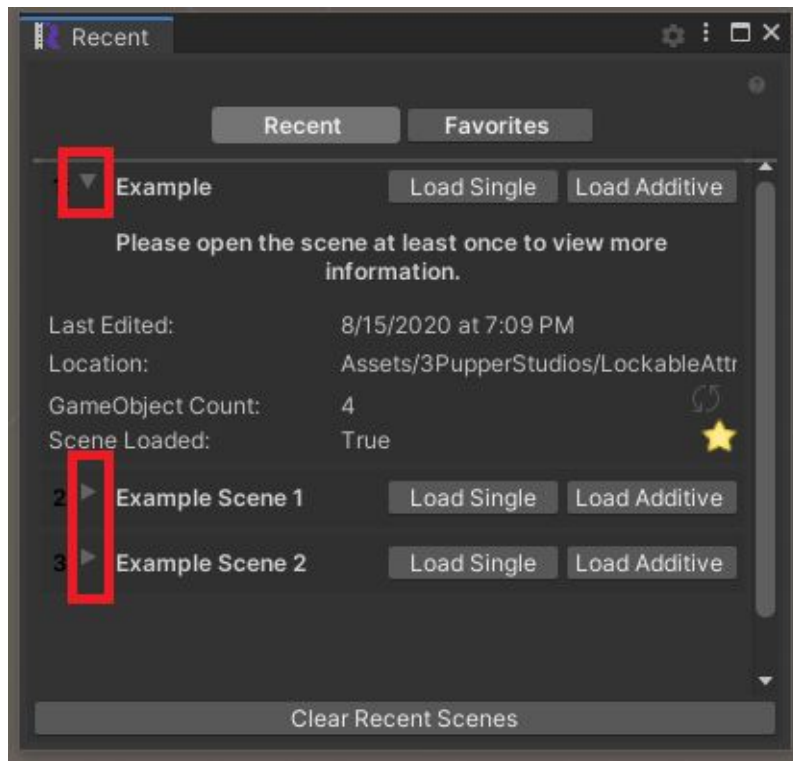

■ Click the "Load Single" button to remove all currently open scenes and open the selected scene.

■ Click the "Load Additive" button to additively add the selected scene.

■ Click the ► icon to open additional information about the selected scene.

■ Click the "Preview" button in the additional information area to load a preview of the selected scene.(This button will only show if the "Track Scene Previews" option is enabled in the settings menu)

■ Click the Refresh icon button in the additional information area to load a preview of the selected scene.(This button will only show if the selected scene is currently loaded)

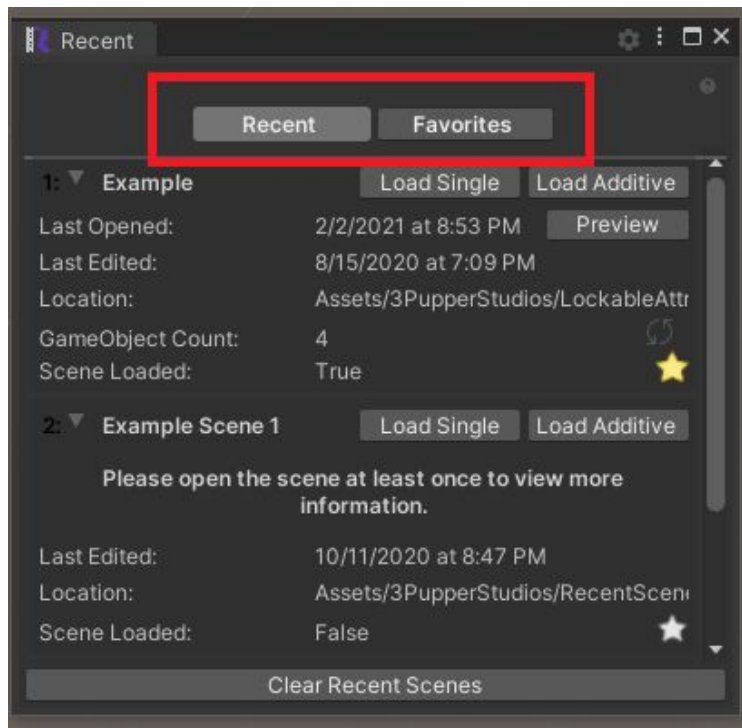

■ Click the star icon or right click on a scene asset and select Favorite Scene in order to add it to your favorited scenes. The star will appear gray if the scene is not favorited and gold if the scene is favorited.
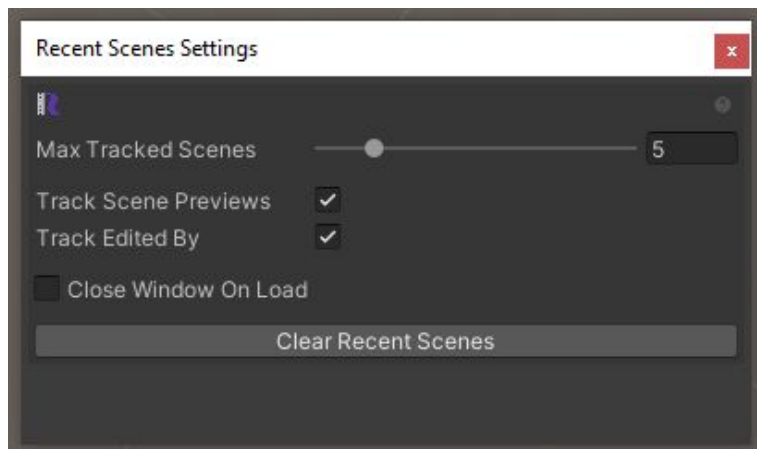

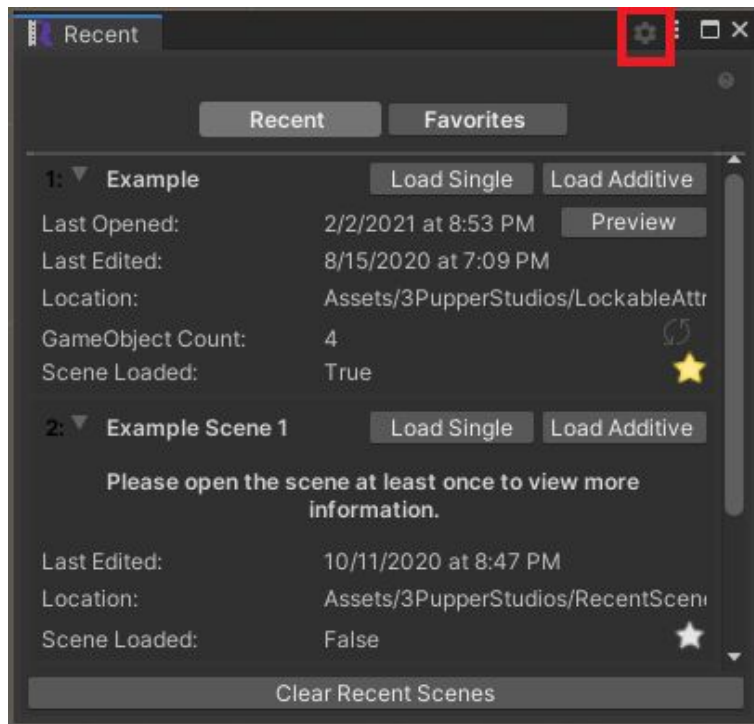

■ You can switch between recent and favorited scenes by selecting Recent or Favorites at the top of the Recent Scenes window.
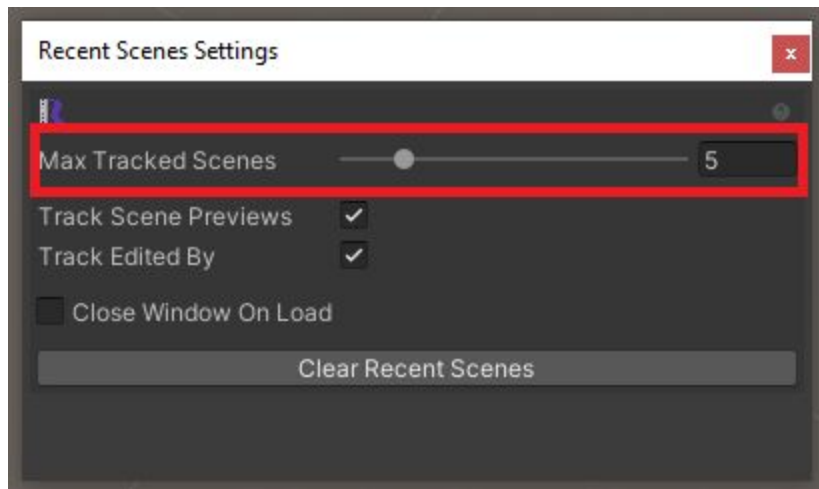

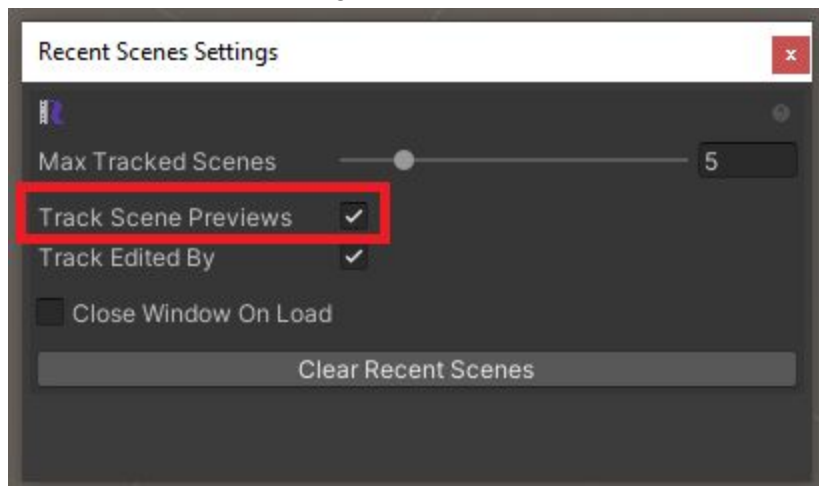

■ Click the Gear/Settings icon in the top right to open the settings menu.

■ Adjust the "Max Tracked Scenes" slider in the settings menu to change the number of scenes the Recent Scenes Manager will keep track of.

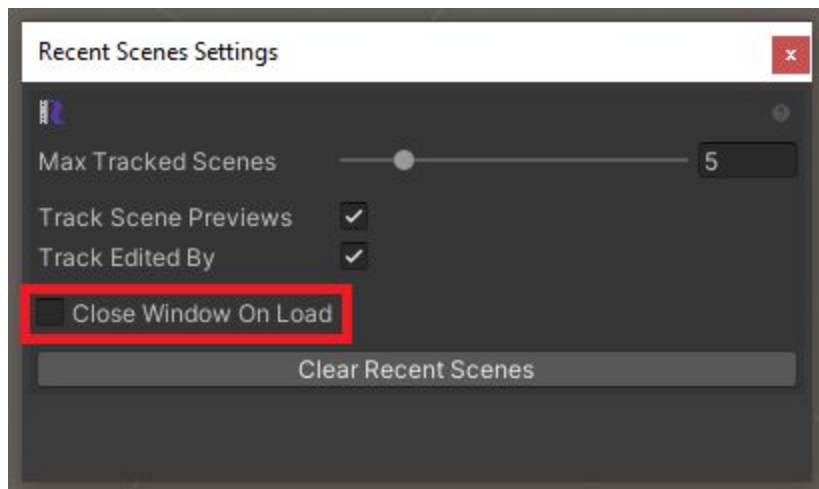

■ Enabling/Disabling the "Track Scene Previews" option in the settings menu will determine if the Recent Scenes Manager will capture scene previews and be able to display them.

■ Enabling/Disabling the "Track Edited By" option in the settings menu will determine if the Recent Scenes Manager will store the EditedBy asset in your project in order to record and display the name of the account last used to make changes to the scene.

■ Enabling/Disabling the "Close Window On Load" option in the settings menu will determine if the Recent Scenes Manager windows will automatically close or not upon loading a scene from the manager.

■ Click the "Clear Recent Scenes" button to reset the Recent Scenes Manager clearing the tracked settings.
